What to Ask Vendors

About DNSSEC

GovSec 2009

DC Convention Center

It's Expo Time!

- The Basics:
  - Does it do DNSSEC according to the most recent RFC's? (RFC 4033, 4034, and 4035)
  - Do your products have FIPS 140 certification?
  - Does it generate keys of the appropriate size? (2048 bit RSA/SHA-1)
  - Can the product be used to manage key material?
  - Can the product generate both NSEC and NSEC3 signed zones?
  - Can I sign/serve/manage multiple zones using this product?

It's Expo Time!

- The Not-So-Basics:
  - Does it integrate with *<your content management system>*?
  - Does it work in your network infrastructure?
  - Does it work with *MS Active Directory/Your DHCP server of Choice*?
  - Can you use an HSM for key management with your product?
  - How do you update zone data using your product?
  - What about logging/Debugging tools?
